

were resistant to Tamiflu! This product just makes large pharmaceutical companies a lot of money for nothing. Would you buy a car that doesn't work?.... and yet our hard earned tax money is going to these companies, many of which have directors in our western governments, governments which appear not to care for our health.

14. As the flu season progresses the governments may coerce or mandate us to undergo vaccination. France and Greece have already ordered enough vaccine to inoculate their entire population and has announced that vaccination will be mandatory. The US appears to be waiting to announce mandatory vaccination at a later date when it can scare the public into consenting to the vaccine. The US government is reported to be hiring people to visit homes of unvaccinated children. This sounds like the Biblical account of Pharaoh attempting to eradicate all the young Israelite baby boys. Must we hide our babies now? Incidentally, why are the third world countries NOT trying a mandatory vaccine program on their citizens, do they know something is up? Saudi Arabia have banned any Britons who have the Flu or vaccine to the Hajj.

15. Public health authorities have cried wolf every flu season to get the public to line up for flu shots. Health authorities repeatedly publish the bogus 36,000 annual flu-related deaths figure to scare the public into getting flu shots. But that figure is based on the combined deaths from pneumonia in the elderly and the flu. Maybe just 5000-6000 or so flu-related deaths occur annually, mostly among individuals with compromised immune systems, the hospitalized, individuals with autoimmune disease or other health problems. As stated above, the swine flu in full force has only resulted in ~500-600 deaths in the first six months in circulation and it is far more dreaded by public health authorities than the seasonal flu. The Centers for Disease Control issues a purchase order for flu vaccines and then serves as the public relations agency to get the public to pay for the vaccines. Out of a population of 325 million Americans, only 100 million doses of flu vaccine have been administered each year and no epidemic has erupted among the unvaccinated.

16. The news media is irresponsible in stirring up unfounded fear over this coming flu season. Just exactly how ethical is it for newspapers to publish reports that a person has died of the swine flu when supposedly thousands die of the flu annually? In the past the news media hasn't chosen to publicize each and every flu-related death, but this time it has chosen to frighten the public. Statistics show that the late flu season of 2009 peaked in week 23 (early June) and has dissipated considerably. While every childhood flu-related death should be considered tragic, and the number of flu-related pediatric deaths in 2009 is greater than prior flu seasons as a percentage, in real numbers it is not a significant increase. According to data provided by the Centers for Disease Control, for week 34 ending August 29, 2009, there were 236 hospitalizations and 37 deaths related to the flu. That would represent just 5 hospitalizations and less than one death per State, which is "below the epidemic threshold."

17. Public health officials are irresponsible in their omission of any ways to strengthen immunity against the flu. No options outside of problematic vaccines and anti-flu drugs are offered, despite the fact there is strong evidence that vitamins C and D especially D3 activate the immune system and the trace mineral selenium prevents the worst form of the disease where the lungs fill up with fluid and literally drown a flu-infected person. The only plausible explanation as to why the flu season typically peaks in winter months is a deficiency of sunlight-produced vitamin D. Protect your family. Arm your immune system with vitamins and trace minerals and fish oils.

18. Will we ever learn if the flu vaccine this year is deadly in itself? In 1993 the federal government hid a deadly flu vaccine that killed thousands of nursing home patients. It was the first year that flu shots were paid for by Medicare. The vaccine-related mortality was so large that this set back the life expectancy of Americans for the first time since the 1918 Spanish flu! Mortality reports take a year or two to tabulate and the federal government may choose not to reveal the true mortality rate and whether it was related to the flu or the vaccines. You say this couldn't happen? It did in 1993! (http://www.newswithviews.com/guest_opinion/guest1155.htm)

19. Do you want the big pharmaceutical companies to reap benefits on the backs of the public who ends up paying for it. While they are putting out a witches brew of dangerous and even life threatening chemicals into all vaccines, they are persuading governments the public need them so they purchase these at taxpayers expense and then the public end up sick and in a worse state. In Revelation in the Bible, John refers to Pharmakeia as "sorcery" and it's ironic that the root word is "poisoner" We have indeed be warned. Check out this article: <http://homepage.ntworld.com/robin.brace/pharmakeia.html>

20. There is now some evidence to suggest that governments are going to use the swine flu vaccine with an RFID (Radio-frequency identification) chip at the tip of the needle. These chips can be used to track every ones movements and can also tell if someone has had the vaccine or not. This could give the governments excuses to force vaccines on the general public like in France and Greece and lead us into a Nazi like state similar to the Gestapo. Again, you say this couldn't happen, well we've already had two world wars and the people have been corralled and forced into programs they didn't like or want. Start by refusing to have your child vaccinated and even consider keeping your child off school if they have given in to vaccine days, you may be prevented from taking your child out and be too late. Last, but definitely NOT least, pray for this is the most powerful form of protection and as James 5:16 says, "The effectual fervent prayer of a righteous man availeth much"

The Real truth about swine flu and the vaccines

What the Government don't want you to know about the vaccines they want you to take and why you shouldn't take them.
